

CONSULTING PROPOSAL · MAY 2026

RM 365

Marketing Operating System

A custom-built platform for Reliable Medicare's marketing team — already live, already connected, already running.

PREPARED FOR
Reliable Medicare

PREPARED BY
DivineSide

WHY THIS MATTERS · THE MATH

RM 365 saves your team £13,000 a year.

Hi [Name] — this proposal opens with the math, not the pitch. Here is exactly what RM 365 returns to your team in time saved, and how the number was worked out.

WHERE TIME IS SAVED	HRS / WEEK	RATE	WEEKLY	ANNUAL
Marketing Analyzer — your MD's daily Meta ads workflow	5	£25/hr	£125	£6,500
Content Autopilot — daily posting across X, Facebook, Instagram	5	£25/hr	£125	£6,500
Total saved per year	10	£25/hr	£250	£13,000

Assumptions, deliberately conservative. Your MD currently spends around an hour every working day pulling Meta ad data, running Claude analyses (budget, campaigns, prioritised actions), and briefing the team. The content-posting flow — writing captions, choosing hashtags, copy-pasting platform-specific versions into Hootsuite for X, Facebook, and Instagram — adds another hour daily, five posts a week. 10 hours × 52 weeks × £25/hr (a deliberately conservative UK marketing-pro rate) = £13,000 a year, before counting anything else.

AND THERE'S MORE

Time savings are the floor — not the ceiling.
On the next page: what RM 365 caught about your account in its first five minutes — the upside that time-savings math doesn't even include.

THE ROI · PROOF

Issue detection is the *upside*.

When we pointed RM 365 at your live Meta account for the first time, it flagged *112 issues* in five minutes. Three of them are recoverable money — straight away.

£14,879

Dead spend. Two campaigns burned this with returns between £0 and £84. *RM - Sales - Prospecting* alone consumed £7,734 across 12,215 clicks with zero purchases. Caught the first time RM 365 ran.

82.89×

Audience fatigue. Retargeting frequency at 82.89× — eight times the safe threshold. CTR collapsed; brand trust at risk with the practitioners you most need on side. RM 365 catches frequency drift the day it starts.

0.14%

Starved winner. Your highest-ROAS ad set (LLA - Customer List, 65.39× return) received this share of total budget — while 0× campaigns consumed the majority. The kind of misallocation that compounds month over month.

THE COMPOUND EFFECT

Time savings are predictable. Issue detection pays back the engagement on its own — possibly many times over.

A competent marketing director could find these manually. The value isn't *that* we found them — the value is that RM 365 finds the next 112 issues on the morning they emerge, before your team has finished their coffee. The diagnostic above took five minutes of platform time. The platform runs every day.

WHAT YOU'RE PAYING FOR

Marketing *Analyzer*

The intelligence layer. RM 365 pulls live data from your Meta ad account, runs daily analysis, and surfaces the issues your team needs to act on — in plain language, with prioritised actions, and with the math already done. **This is the value driver behind the engagement fee.**

Built on FastAPI + Jinja + HTMX. Live Meta data via Pipeboard MCP. Analysis powered by Claude Sonnet (consultant report) and Gemini (creative intelligence). Two-database Supabase architecture for snapshot history.

MODULE	WHAT IT DOES
AI Report	Consultant-style report regenerated against live data — health badges, prioritised actions, diagnoses per campaign and ad set.
Overview	KPI dashboard with sparklines, period comparison (vs prev 7d / 30d / quarter), spend + revenue trend chart.
Campaigns / Ad Sets	Sortable, filterable tables with every key metric. One-click CSV export.
Compare	Side-by-side comparison for any two date ranges with a visual delta bar chart.
AI Chat	Embedded analyst pre-loaded with your account context, brand voice, and campaign history. Ask anything, get account-specific answers in seconds.
Creative Analysis	Per-ad-set creative review using Gemini — surfaces what's working visually and why.

BUILT SEPARATELY · ALREADY AGREED

Content *Autopilot*

PRICING NOTE

£95/month — already agreed, billed separately.

Content Autopilot was built as a separate project under its own existing arrangement. It is not bundled into this engagement and not part of the price below — it continues unchanged.

The operations layer. Upload one piece of content. The system handles caption writing, platform selection, scheduling, and publishing across six channels — all in your brand voice.

MODULE	WHAT IT DOES
Upload	Drag-and-drop video, photo, or carousel. Pick a schedule time. Hit Schedule. AI handles the rest.
AI Captions	Claude writes platform-specific captions in your brand voice, trained on your approved-caption history.
Multi-Platform Publishing	Auto-publishes to Facebook, Instagram, LinkedIn, TikTok, X, and YouTube Shorts via Hootsuite + Bundle.Social.
Queue	Every upload tracked — status, per-platform error chips, one-click retry on failure.
Rules	Plain-English rules system for brand voice, hashtag policy, link insertion. Your team edits without touching code.
Comments Inbox PLANNED	Unified inbox across all platforms with AI-drafted replies. <i>Mockup designed and approved; backend build scheduled as the next module after analyzer hand-off.</i>

INCLUDED FREE · BUNDLED BONUS

Team *Infrastructure*

The reason RM 365 is a *system*, not a tool — and **included free** with the engagement. None of this is what you're paying for; it comes bundled with the analyzer regardless.

One login covers both products — analyzer and autopilot

Role-based permissions: viewer or admin, across analyzer or scheduling

Admin pages to invite team members, edit permissions, manage accounts

Audit log records every authenticated action — who did what, when, where

Self-serve password reset and session management

Custom UI, designed and iterated to your team's feedback

ADMIN · USERS

ACTIVITY LOG

The AI Report

The single most important surface in RM 365. A consultant-grade report on your Meta account — regenerated against live data, structured around health badges, prioritised actions, and per-campaign diagnoses.

Top of report — account-level KPIs, automated scan ("68 issues found"), and the three highest-priority actions for this period.

What your team logs into *each day*

The AI Report is the flagship. Around it sits the rest of the daily surface — eight working modules across analyzer, content operations, and team admin.

AI CHAT

Embedded analyst pre-loaded with your account context

Campaigns & *comparison*

CAMPAIGNS

Sortable, filterable table with every key metric; CSV export

COMPARE

Side-by-side date-range comparison with delta bar chart

Content *operations*

UPLOAD

Drag-and-drop, schedule picker, AI handles captions + publishing

CONTENT QUEUE

Per-post status, per-platform error chips, one-click retry

Rules & engagement

RULES

Plain-English brand voice, hashtag policy, link insertion

COMMENTS INBOX PLANNED

Mockup approved; backend build scheduled as the next module

THE INVESTMENT

The *price*

You're paying for the analyzer's ROI. Everything else — the internal team-management system, audit log, role-based permissions, and custom UI we built and iterated against your feedback — comes *free*.

WHAT YOU'RE GETTING	PRICE
RM 365 platform access — Marketing Analyzer (AI Report, Overview, Campaigns, Ad Sets, Compare, AI Chat, Creative Analysis) Bundled <i>free</i>: SSO, role-based permissions, admin pages, audit log, custom UI built and iterated to your team's feedback.	£2,500 PLATFORM FEE
Content Autopilot — Upload, AI captions, multi-platform publishing, queue, rules Built as a separate project under the existing agreement. <i>Not part of this proposal</i>. Continues unchanged.	£95 /MONTH, EXISTING BILL
Ongoing maintenance & support retainer Bug fixes, monitoring, feature evolution, monthly check-in. To be finalised together.	[TBD] RETAINER

THE MATH · PLAIN

ANNUAL SAVING	PLATFORM FEE	PAYBACK IN	YEAR-1 ROI
£13,000	£2,500	2.5 mo	5.2×

You save £1,000 a month in team time alone. The £2,500 platform fee is recovered in two and a half months. Every month after that is straight cost saving — and that's before counting the issue-detection upside (like the £14,879 RM 365 caught on its first run).

THE FIRST FORTNIGHT

Onboarding *timeline*

Everything below runs against an **already-live system**. There is no build phase. RM 365 runs the moment you sign.

-  **WEEK 01**
Each team member receives a login. Roles assigned (admin / viewer x analyzer / scheduling).
-  **WEEK 01**
Loom walkthrough video delivered — every module, every dashboard. Watch on your own time, share across the team, revisit whenever you need.
-  **WEEK 01-03**
Your team uses RM 365 in their daily workflow — analyzer reviews, content uploads, scheduling. Feedback captured as it surfaces.
-  **WEEK 02-03**
DivineSide iterates on the team's feedback — refinements, fixes, small additions before the system locks at v1.
-  **WEEK 04**
Final hand-off. System locked at v1; monthly cadence begins.
-  **MONTH 02+**
Ongoing operation. System runs daily; we meet monthly; evolution requests handled through the Plus tier as they emerge.

THE AGREEMENT

Terms

O1 Engagement

DivineSide provides Reliable Medicare with ongoing access to RM 365 and continuing system operation under the agreed pricing structure. The £2,500 platform fee is one-time. The maintenance retainer (once agreed) may be terminated by either party with 30 days written notice; platform access continues regardless. The Content Autopilot arrangement remains under its existing separate agreement.

O2 Access

Reliable Medicare grants DivineSide read access to your Meta ad account via Pipeboard for monitoring and reporting. DivineSide does not change campaigns, budgets, or creative — operational control stays with your team.

03 **Ownership**

The RM 365 codebase is owned by Reliable Medicare. The repository lives in Reliable Medicare's GitHub; all third-party accounts (Supabase, Zeabur, Anthropic, Google, Pipeboard, Hootsuite, Bundle.Social) are registered to Reliable Medicare. DivineSide operates and maintains the system on your behalf. On termination, access transfers in full — nothing leaves with us.

04 **Confidentiality**

Both parties keep all engagement terms and account data strictly confidential.

05 **Third-party services**

You maintain active subscriptions to the services RM 365 depends on. DivineSide gives 30 days notice if any required service is added or deprecated.

LET'S BEGIN

Ready when *you are.*

RM 365 is built. Reliable Medicare's account is connected. The team that operates it is on standby. The only piece missing is the signature below.

By signing, both parties enter the engagement described in this proposal, effective from the date below, governed by the terms on the previous page.
