

CONSULTING PROPOSAL · MAY 2026

RM 365

Marketing Operating System

A custom-built platform for Reliable Medicare's marketing team — already live, already connected, already running.

PREPARED FOR
Reliable Medicare

PREPARED BY
DivineSide

CONTENTS

What's *in here*

Three sections: what it returns, what we built, and what it costs. Skip ahead, jump back, no order required.

WHAT IT RETURNS

The ROI · The Math	Hours saved per week, translated to pounds per year	02
The ROI · Proof	£14,879 in wasted spend RM 365 caught on its first scan	03

WHAT WE BUILT

Marketing Analyzer	The intelligence layer. Modules and what each does.	04
Content Autopilot	The operations layer. Upload once, publish across six channels.	05
Team Infrastructure FREE	£5,000+ of internal team system, bundled at no extra cost	06
AI Report (flagship)	The single most important surface, in screenshots	07
Daily Surfaces (I–IV)	What your team logs into every day, page by page	08–11

WHAT IT COSTS

The Price	Per-workflow payback math	12
The Retainer	What £350/month buys	13
Onboarding	The first fortnight, week by week	14
Terms + Next Steps	Legal mechanics, and how to say yes	15

WHY THIS MATTERS · THE MATH

RM 365 saves your team £13,000 a year.

Hi. This proposal opens with the math, not the pitch. Here is exactly what RM 365 returns to your team in time saved, and how the number was worked out.

WHERE TIME IS SAVED	HRS / WEEK	RATE	WEEKLY	ANNUAL
Marketing Analyzer — Zifonia's daily Meta ads workflow	5	£25/hr	£125	£6,500
Content Autopilot — daily posting across X, Facebook, Instagram	5	£25/hr	£125	£6,500
Total saved per year	10	£25/hr	£250	£13,000

Assumptions, deliberately conservative. Zifonia currently spends around an hour every working day pulling Meta ad data, running Claude analyses (budget, campaigns, prioritised actions), and briefing the team. The content-posting flow — writing captions, choosing hashtags, copy-pasting platform-specific versions into Hootsuite for X, Facebook, and Instagram — adds another hour daily, five posts a week. 10 hours × 52 weeks × £25/hr (a deliberately conservative UK marketing-pro rate) = £13,000 a year, before counting anything else.

AND THERE'S MORE

Time savings are the floor — not the ceiling.

On the next page: what RM 365 caught about your account in its first five minutes — the upside that time-savings math doesn't even include.

Issue detection is the *upside*.

When we pointed RM 365 at your live Meta account for the first time, it flagged *112 issues* in five minutes. Three of them are recoverable money — straight away.

£14,879

Dead spend. Two campaigns burned this with returns between £0 and £84. *RM - Sales - Prospecting* alone consumed £7,734 across 12,215 clicks with zero purchases. Caught the first time RM 365 ran.

82.89×

Audience fatigue. Retargeting frequency at 82.89× — eight times the safe threshold. CTR collapsed; brand trust at risk with the practitioners you most need on side. RM 365 catches frequency drift the day it starts.

0.14%

Starved winner. Your highest-ROAS ad set (LLA - Customer List, 65.39× return) received this share of total budget — while 0× campaigns consumed the majority. The kind of misallocation that compounds month over month.

THE COMPOUND EFFECT

Time savings are predictable. Issue detection pays back the engagement on its own — possibly many times over.

A competent marketing director could find these manually. The value isn't *that* we found them — the value is that RM 365 finds the next 112 issues on the morning they emerge, before your team has finished their coffee. The diagnostic above took five minutes of platform time. The platform runs every day.

WHAT YOU'RE PAYING FOR

Marketing *Analyzer*

Saves 5 hours every week. £541/month. £6,500/year. Plus the upside of catching wasted spend like the £14,879 RM 365 found on its first scan.

Pulls live data from your Meta account, runs daily analysis, and surfaces what your team needs to act on. Plain language. Prioritised actions. Math done.

WHAT'S INSIDE

MODULE	WHAT IT DOES
AI Report	Consultant-grade report against live data. Health badges, prioritised actions, per-campaign diagnoses.
Overview	KPI dashboard, sparklines, period comparison, spend + revenue trend.
Campaigns / Ad Sets	Sortable tables, every key metric, one-click CSV export.
Compare	Any two date ranges, side-by-side, visual delta chart.
AI Chat	Embedded analyst with your account context. Ask anything, get answers in seconds.
Creative Analysis	Per-ad-set creative review. Surfaces what's working visually and why.

BUILT SEPARATELY · ALREADY AGREED

Content *Autopilot*

Saves another 5 hours every week. £541/month. £6,500/year. Upload once. Captions, scheduling, and publishing across all six channels run themselves, in your brand voice.

WHAT'S INSIDE

MODULE	WHAT IT DOES
Upload	Drag-and-drop video, photo, or carousel. Pick a time. AI handles the rest.
AI Captions	Claude writes platform-specific captions in your brand voice.
Multi-Platform Publishing	Auto-publishes to Facebook, Instagram, LinkedIn, TikTok, X, YouTube Shorts.
Queue	Every upload tracked. Per-platform error chips, one-click retry.
Rules	Plain-English rules for brand voice, hashtags, links. Your team edits, no code.
Comments Inbox PLANNED	Unified inbox across platforms with AI-drafted replies. Mockup approved; next module after analyzer hand-off.

BUNDLED FREE · NO EXTRA COST

Team Infrastructure, included.

A complete internal team system. Worth £5,000+ as a custom build. Yours regardless.

- One login covers both products
- Role-based permissions: viewer or admin, across analyzer or scheduling
- Admin pages to invite team members, edit permissions, manage accounts
- Audit log of every authenticated action
- Self-serve password reset and session management
- Custom UI, designed and iterated to your team's feedback

ADMIN · USERS

Invite, edit permissions, delete accounts

RM 365 MARKETING OS Admin / Users

Users & permissions
3 users - Invite teammates, assign per-app access (analyzer / scheduling), or remove users entirely.

Invite a new user

EMAIL: ANALYZER: SCHEDULING: SUPER ADMIN:

[Create user & show temp password →](#) Auto-creates the account in Supabase with a one-time password.

USER	ANALYZER	SCHEDULING	SUPER ADMIN	LAST SEEN	
pangyickho@gmail.com 6364310...	Admin	Admin	No	2028-05-16	Save Delete
info@kym.com 10849197...	None	Admin	No	2028-05-15	Save Delete
yhpang@oneboxagency.com 4039104...	Admin	Admin	No	2028-05-17	Save Delete

This page cannot reset a user's password directly — Supabase doesn't expose that as an admin action. Use Supabase dashboard → Authentication → Users → ... → Send password reset. The self-logout guard refuses any save that would strip your own admin role.

[Change password](#) [Sign out](#)

The AI Report

The single most important surface in RM 365. A consultant-grade report on your Meta account — regenerated against live data, structured around health badges, prioritised actions, and per-campaign diagnoses.

Top of report — account-level KPIs, automated scan ("68 issues found"), and the three highest-priority actions for this period.

Budget analysis — current allocation by campaign, scale-up / pause / wasted-spend recommendations, and a plain-English summary at the bottom.

What your team logs into *each day*

The AI Report is the flagship. Around it sits the rest of the daily surface — eight working modules across analyzer, content operations, and team admin.

THE INVESTMENT

The *price*

The £2,500 below pays for the Marketing Analyzer. The team infrastructure on page o6 came bundled with it, free.

WHAT YOU'RE PAYING FOR	PRICE
RM 365 platform access — Marketing Analyzer The value driver. AI Report, Overview, Campaigns, Ad Sets, Compare, AI Chat, Creative Analysis. Saves £6,500/year. Pays back in 4.6 months.	£2,500 ONE-TIME
Content Autopilot Already paid. Flagged here for completeness. Saves £6,500/year. Already returning.	£95 ONE-TIME, PAID
Ongoing support retainer Weekly 30-min strategy call. Monitoring and bug fixes (response within one business day). Self-service error doc, updated as the system evolves. 25% off every new workflow build. Priority queue. Net positive day 1. £541/month saving vs £350/month fee. Plus discount value on every new build.	£350 /MONTH

THE MATH · PER WORKFLOW	
MARKETING ANALYZER £6,500/yr Saved annually. Platform fee pays back in 4.6 months.	CONTENT AUTOPILOT £6,500/yr Saved annually. £95 already paid. Returning since day one.
£13,000 saved every year. Before counting upside like the £14,879 in dead spend RM 365 caught on its first scan.	

ONGOING SUPPORT

What *£350/month* buys

A small, sharply scoped retainer. Two reasons it exists: keep your live workflows running, and give you first dibs (plus a cheaper rate) on every new build.

INCLUDED EVERY MONTH

- **Weekly 30-minute strategy call.** We review what the system surfaced this week and discuss the next workflow opportunity worth building.
- **Monitoring and bug fixes** on every live workflow. Response within one business day.
- **Self-service error documentation.** Your team handles minor errors without waiting. Updated as the system evolves.
- **25% discount on every new workflow build.**
- **Priority queue** when you commission a new workflow.

THE DISCOUNT IN PRACTICE

A 25% discount on every new workflow you commission.

For example: a workflow we'd normally scope at £2,500 lands at £1,875 instead. SEO, AEO, Comments Inbox, anything already on your roadmap. The £350/month covers monitoring and the weekly strategy call. The discount is bonus value that stacks every time you build something new.

THE FIRST FORTNIGHT

Onboarding *timeline*

Everything below runs against an **already-live system**. There is no build phase. RM 365 runs the moment you sign.

WEEK 01

Each team member receives a login. Roles assigned (admin / viewer x analyzer / scheduling).

WEEK 01

Loom walkthrough video delivered — every module, every dashboard. Watch on your own time, share across the team, revisit whenever you need.

WEEK 01-03

Your team uses RM 365 in their daily workflow — analyzer reviews, content uploads, scheduling. Feedback captured as it surfaces.

WEEK 02-03

DivineSide iterates on the team's feedback — refinements, fixes, small additions before the system locks at v1.

WEEK 04

Final hand-off. System locked at v1; monthly cadence begins.

MONTH 02+

Ongoing operation. System runs daily; we meet monthly; evolution requests handled through the Plus tier as they emerge.

THE AGREEMENT

Terms

O1 Engagement

DivineSide provides Reliable Medicare with ongoing access to RM 365 and continuing system operation under the agreed pricing structure. The £2,500 platform fee is one-time. The maintenance retainer may be terminated by either party with 30 days written notice; platform access continues regardless. The Content Autopilot arrangement remains under its existing separate agreement.

O2 Access

Reliable Medicare grants DivineSide read access to your Meta ad account via Pipeboard for monitoring and reporting. DivineSide does not change campaigns, budgets, or creative — operational control stays with your team.

O3 Ownership

The RM 365 codebase is owned by Reliable Medicare. All third-party accounts (Supabase, Zeabur, Anthropic, Google, Pipeboard, Hootsuite, Bundle.Social) are registered to Reliable Medicare. DivineSide operates and maintains the system on your behalf. On termination, access transfers in full — nothing leaves with us.

O4 Confidentiality & third-party services

Both parties keep all engagement terms and account data strictly confidential. Reliable Medicare maintains active subscriptions to the services RM 365 depends on; DivineSide gives 30 days notice if any required service is added or deprecated.

NEXT STEPS

Ready when *you are*.

If this proposal looks right, just reply with a "go". I'll send the Upwork proposal with the payment link attached. Payment runs through Upwork's escrow. The moment payment clears, your team gets logins and the system stays running.

Questions instead of a yes? Reply with them. No pressure, no signature required, nothing to print.
